7.2 Ear Decomposition

Solution:

- 1- Find a spanning tree of the given graph and choose a root for the tree.
- 2- Determine, for each edge uv that is not part of the tree, the distance between the root and the lowest common ancestor of u and v.
- 3- For each edge uv that is part of the tree, find the corresponding "master edge", a non-tree edge wx such that the cycle formed by adding wx to the tree passes through uv and such that, among such edges, w and x have a lowest common ancestor that is as close to the root as possible (with ties broken by edge identifiers).

4- Form an ear for each non-tree edge, consisting of it and the tree edges for which it is the master, and order the ears by their master edges' distance from the root (with the same tie-breaking rule).

7.3 Extended Catalan

number of ways for going from 0 to A with k moves without going to -B:

$$\binom{k}{\frac{A+k}{2}} - \binom{k}{\frac{2B+A+k}{2}}$$

7.5 Find Polynomial from it's Points

$$P(x) = \sum_{i=1}^n y_i \prod_{j=1, j \neq i}^n \frac{x-x_j}{x_i-x_j}$$

7.6 Geometry Duality

duality of point (a, b) is y = ax - b and duality of line y = ax + b is (a, -b)
Properties:

1. p is on l iff l* is in p*
2. p is in intersection of l1 and l2 iff l1* and l2* lie on p*

3. Duality preserve vertical distance
4. Translating a line in primal to moving vertically in dual
5. Rotating a line in primal to moving a point along a non-vertical line
6. $li \cap lj$ is a vertex of lower envelope $\iff (li^*, lj^*)$ is an edge of upper hull in dual

7.7 Knuth

Knuth Optimization is applicable if $C_{i,j}$ satisfied the following 2 conditions:

- 1- Quadrangle Inequality: $C_{a,c} + C_{b,d} \leq C_{a,d} + C_{b,c}$ for $a \leq b \leq c \leq d$
- 2- Monotonicity: $C_{b,c} \leq C_{a,d}$ for $a \leq b \leq c \leq d$

Then if the smallest k that gives optimal answer in $dp_{i,j} = dp_{i-1,k} + C_{k,j}$ equals to $A_{i,j}$ we have:

$$A_{i,j-1} \leq A_{i,j} \leq A_{i+1,j}$$

7.8 LP Duality

primal: Maximize $c^T x$ subject to $Ax \leq b, x \geq 0$
dual: Minimize $b^T y$ subject to $A^T y \geq c, y \geq 0$
